REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Concerning claims 22-24,27,28,31-48 there is no prior art that teach a method of using a thermal inkjet filled with fluid containing nucleic acid and actuating thermal inkjet head to expel quantiy fluid onto array comprising a plurality of nucleic acids stably attached onto an array surface. The prior art teaches the use of thermal inkjet to fabricate arrays but do not teach or suggest using thermal inkjets to expel fluid containing nucleic acid onto an already fabricated nucleic acid array. For example, Milton (6,146,833) teach depositing using a thermal inkjet onto acyl fluoride activated surfaces for the purpose of attaching the oligonucleotides to surfaces to fabricate the nucleic acid array (see col. 10 line 23-30). Milton does not then teach or suggest using the thermal inkjet to expel nucleic acid onto an already fabricated nucleic acid array.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
